

Cleaning the outside of your windows...from the inside

Several people have asked me how to clean the outside of the windows at Botanica. They have those catches that stop you opening far enough to do anything – and those catches are an important safety device.

Here are some pictures to show you what you can do

The catch here is operating normally

Move it all the way to the end

It should then 'pop up'. If you have never done this, it may be a bit stiff but requires no tools or massive strength...just patience. Also be very careful not to fall out the window!!

The window can now be opened far enough to clean the outside – again be extra careful not to fall and not to drop your window cleaning devices!!

IMPORTANT – Put the clip back on. Simple do the reverse of the above – it is a legal requirement to have these devices attached and they are important for your safety.
