

Baseline

As part of CYP's Construction Environmental Management Plan (CEMP), baseline noise monitoring is required to help form the project criteria for noise guideline targets for construction works during the project delivery of the Domain North Station Box. A summary of the baseline noise monitoring results is tabulated below in Table 1.

Table 1. Baseline Noise Levels – The Botanica Monitor

Location	Average L ₉₀ Background levels dB(A)			Average L _{eq} Ambient Noise levels dB(A)		
	Day	Evening	Night	Day	Evening	Night
400 St Kilda Rd	56	53	47	64	63	59

Analysis of monitoring results indicate average noise levels for each period are generally consistent from day to day with only a small amount of variation.

RIMG – Alternative Accommodation

Alternative accommodation will be offered where the total airborne noise level due to Unavoidable Works at night, measured or predicted at a point 1m in front of the exposed windows and doors of any façade of a residence, exceeds whichever is the higher of:

- 65dB (A); or
- 10dB (A) above the pre-existing ambient, LAeq, noise level,

Between 10pm and 7am on any day of the week on at least:

- 10 days in any 15 consecutive days; or
- 40 days in any six consecutive months

Baseline ambient Noise Level Limit monitoring at 400 St Kilda Road during night time hours is 59dB(A), indicating an exceedance noise level of greater than LAeq, 60min of 69 dB(A).

RIMG – Acoustic Treatment

The RIMG sets out criteria for when offers of acoustic treatment to residences must be considered for Unavoidable Works at night. Offers of acoustic treatment will however only be made where acoustic treatment is deemed to be an effective solution to mitigating airborne noise.

Acoustic treatment for residences will be offered where the total airborne noise level due to Metro Tunnel works (pre-existing ambient, LAeq(T), measured over one hour plus airborne noise from Metro Tunnel works) is predicted at a point one metre in front of the most exposed of any windows or doors of a habitable room in any façade of a residence, to exceed whichever is the higher of:

- 55dB(A); or
- 5 dB(A) above the pre-existing ambient LAeq, noise level

between the hours of 10pm and 7am on any day of the week on at least 40 days in any six consecutive months, excluding any night during which an offer of alternative accommodation has been accepted.

Baseline ambient Noise Level Limit monitoring at 400 St Kilda Road during night time hours is 59dB(A), indicating an exceedance noise level of greater than LAeq, 60min of 64 dB(A).

Results

Night (10:00pm to 7:00am) – Alternative Accommodation

0 nights where exceedances were >69dB

Night (10:00pm to 7:00am) Acoustic Treatment

1 night where exceedances were >64dB
