

Truck speeds

This system I am using is certainly not admissible in court but it is within 10%. For that reason, I have flagged any vehicle doing 44 kmph or less in green, others are in red.

These 45 vehicles went past The Botanica on the evening of Sept12 and morning of Sept 13.

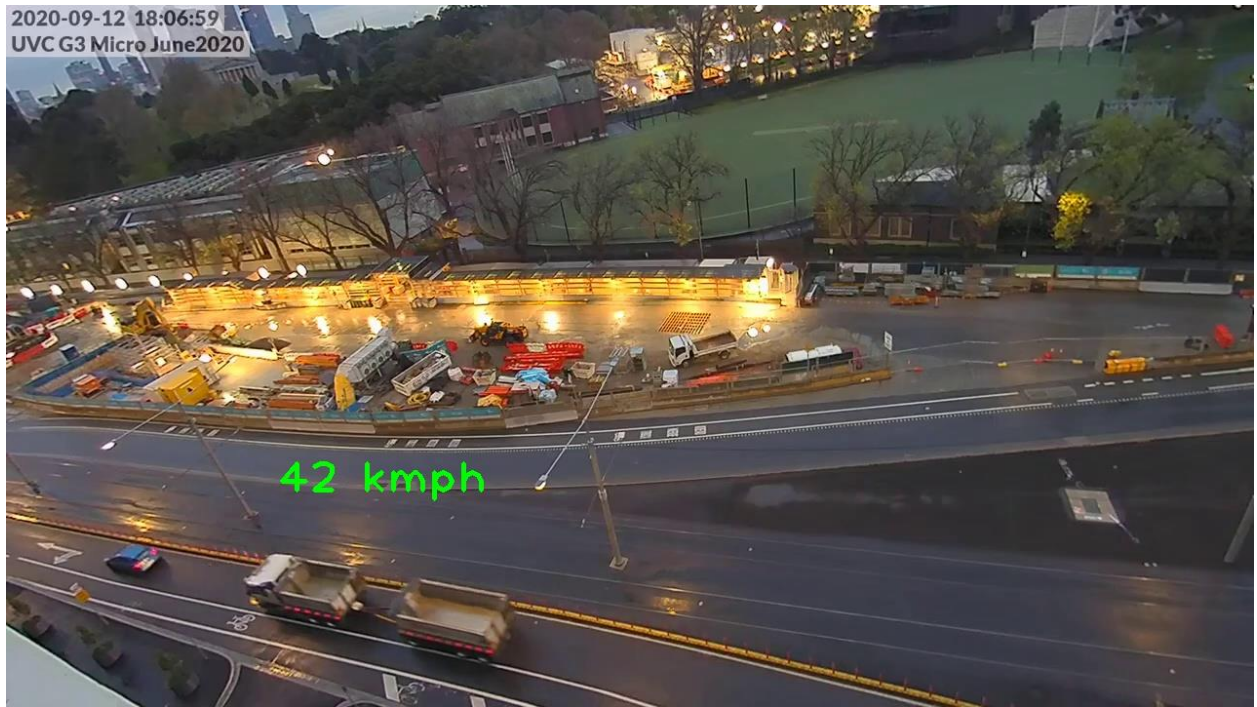

Average speed of the 45 trucks is 50 kmph

Trucks were recorded at 68, 63 and 60 kmph.

More than 80% of the trucks were exceeding 44 kmph.

If the trucks did not speed and the bumps in front of our building were rectified then the impact on us is dramatically improved.
